COVID Plan

Teams will be allowed to return to the team center if Mexico is orange level or less, governments allow for teams crossing the borders, and teams agree to and sign the new waiver and procedures. Teams are also requested to bring masks, hand sanitizer, and other PPE they deem necessary. Items below are recommendations to inform team member responsibility but will not be enforced by Missions Ministries.

1. It is suggested that team members would test for COVID 3-5 days before the trip. They would make attempts to quarantine before their trip.
2. If circumstances arise involving illness all team members, tested and immunized, would need to follow Missions Ministries staff, in consultation with team leaders, directives while part of the team in El Paso and Juarez.
3. It is suggested that team members will wear a mask any time that they are out of their rooms. Exceptions are eating and drinking. This includes at the jobsite.
4. Outreach (food, orphanage, church, prayer walk) will be modified to limit person to person contact and exposure to the general public.
5. A COVID waiver included in the registration process must be signed.
